

Project Details

User Story Example

As a user, I want to input text and get a link:

As a user, I aim to paste or type text into a dedicated field.

So that I can quickly obtain a unique link to share the content.

Acceptance Criteria:

- The platform should offer a clear text input area for pasting or typing text.
- After inputting the text, Pastebin should instantly generate a unique link for the shared content.
- Generating the link should be straightforward and immediate, requiring no additional information.
- The link should be prominently visible for easy copying and sharing.

As a user, I want to easily open and share the link:

As a user with the shared link, I aim to open it and view the text hassle-free.

So that I can effortlessly read and share the content with others.

Acceptance Criteria:

- Clicking the shared link should directly open the content in a web browser without any login requirements.
- The text should be displayed clearly and legibly, maintaining its original format and structure.
- The link should be conveniently copyable from the browser's address bar or provided adjacent to the shared text for seamless sharing across various platforms.
- Recipients of the link should access the content immediately upon opening the link without any complexities.

Persona Example

Name: Alias Persona

Background: Alias is a 28-year-old freelance writer who works remotely for various clients. He writes articles, blog posts, and marketing content for different industries and publications.

Goal:

1. **Client Collaboration:** Alias needs a document-sharing platform to share drafts, receive feedback, and collaborate with clients and editors in real-time.
2. **Ease of Use:** He looks for an intuitive platform that allows straightforward document sharing and commenting without a steep learning curve.
3. **Version Tracking:** Alias requires a platform that keeps track of document versions, enabling him to revert to earlier drafts if needed.
4. **Compatibility:** He prefers a platform that supports various file formats (such as .docx, .pdf, etc.) to accommodate different client preferences.
5. **Secure Sharing:** Alias values secure document sharing to ensure confidentiality and privacy for his work-in-progress documents until they're ready for publication.
